## SUMMARY

Software Engineer experienced in developing backend systems, APIs, and full stack applications. Built real world products involving authentication, real time communication, and database driven workflows, with hands on experience debugging and shipping features. Eager to contribute to high ownership engineering teams and solve strong technical problems.

## TECHNICAL SKILLS

**Languages:** C++, Python, JavaScript (ES6+), TypeScript

**Frontend:** React.js, HTML5, CSS3, Tailwind CSS, Responsive UI Development

**Backend:** Node.js, Express.js, RESTful API Development, Authentication and Authorization

**Databases:** MongoDB (NoSQL), MySQL

**Developer Tools:** Git(Version Control), GitHub, Postman, Cloudinary

**Practices:** Agile Development, Code Reviews

## WORK EXPERIENCE

### Software Development Intern

#### Bluestock Fintech

May 2025 – July 2025

- Developed and maintained IPO management admin dashboards using the MERN stack, enabling secure CRUD operations and seamless frontend backend integration for IPO listings.
- Collaborated actively with cross-functional engineering and product management teams within an Agile environment to debug full-stack anomalies, resolving major 5 platform performance bottlenecks.
- Integrated with the engineering teams to debug backend services, APIs, and database interactions, improving system reliability and application performance.

## PROJECTS

### [Recruito – AI Recruitment Platform](https://recruitoooo.vercel.app/) | <https://recruitoooo.vercel.app/>

Oct 2025 – Nov 2025

- Built a full stack recruitment platform using Node.js and Express enabling recruiters to post jobs and manage candidate applications through structured workflows.
- Implemented AI driven candidate shortlisting and role-based authentication, improving recruiter efficiency and application filtering.

**Tech Stack:** Node.js, Express.js, MongoDB, REST APIs, JWT

### [ChatterSpace – Real Time Chat Application](https://chatterspace.vercel.app/) | <https://chatterspace.vercel.app/> |

Jan 2024 - Mar 2025

- Developed a real time messaging application using the MERN stack and Socket.IO, designing scalable communication workflows for concurrent users and distributed interactions
- Applied modular architecture principles, API testing, and performance optimization techniques to enhance maintainability, reliability, and integrated JWT auth, OAuth and Gmail OTP authentication.

**Tech Stack:** MERN stack, Socket.IO, Google OAuth, Gmail OTP verification, JWT

### [Personal Finance Tracker](https://expense-tracker-livid-beta-98.vercel.app/) | <https://expense-tracker-livid-beta-98.vercel.app/> |

Mar 2026 - Apr 2025

- Engineered a MERN-stack dashboard with a RESTful API on Vercel Serverless and MongoDB Atlas, migrating from local storage to a persistent cloud database for real-time data integrity.
- Developed a high-performance UI featuring Admin/Viewer CRUD permissions, persistent Dark Mode, and Infinite Scrolling with Intersection Observer to handle large datasets seamlessly.

**Tech Stack:** React.js, MongoDB Atlas, Tailwind CSS, Vercel Serverless

## EDUCATION

### Rajiv Gandhi University of Knowledge Technologies

2022 – 2026

B.Tech - Electronics and Communication Engineering - **CGPA – 7.6**

Ongole, Andhra Pradesh

### Rajiv Gandhi University of Knowledge Technologies

2020 – 2022

PUC - Pre-University Course - **CGPA – 8.75**

Ongole, Andhra Pradesh

## CERTIFICATIONS

- NPTEL certification on **computing with python** from IIT Ropar.

May – July 2025

- NPTEL certificate on **Data Base Management System(DBMS)**.

Jul - Sept 2024
